

21/12/2001

Dear Dr. Attthreya,

To some one special

Your association with me is very very very extra special in many ways.

What I am today - my success, my achievements, my family, my work, my life, your impact, your training's impact, which was very powerful 30 years ago, still guides me. I really mean it. I have your notes - your ideas your wisdoms, which you gave us at Indo American Society, at West End Hotel, 30 years ago.

You made me totally conscious - aware about the value of creating goals, dreams, values, and beliefs in life, which I am religiously doing for the past 30 years.

You inspired me to create the FUTURE I want and enjoy my creations, to dare to see impossible dreams and make them come true.

You always gave me positive strokes and, directly and indirectly, supported me to make it a habit to do to others. I am giving strokes and it works wonders and creates magical transformation!

Learning is a continuous process. You said in your class, the person who stops learning stops living. He becomes atrophy and dies.

These are some extra special wisdoms, HABITS you planted in my heart and mind, which have become a huge tree and giving fruits to thousands.

Thank you very much for making a big difference in my life!

Yours truly,

Dr. Pankaj Naram
